Next Generation IT Staffing & Recruiting Services

IT Automation LLC is a leading technology services provider that excels in delivering value through innovation, expertise, and the early deployment of enterprise applications. As an American corporation, our primary focus is on delivering cutting-edge Information Technology solutions to a diverse range of clients, including fortune 500 companies, small businesses, as well as local, state, and federal government agencies throughout the United States. Our commitment is reflected in our disciplined approach to design, develop and implement tactical solutions. We specialize in comprehensive consulting, development, digital platform enablement, and strategic operations with pride in our commitment to excellence.

Drawing on unparalleled experience and specialized skills, such as our Quality as a Service model, we operate at the convergence of business and technology. Our goal is to assist clients in early adoption, enhance performance, provide added value, and cultivate sustainable opportunities for their stakeholders. IT Automation LLC holds a distinctive position to identify the ideal opportunities for you in IT Service Strategy and Workforce Management.

Extensive Network of Qualified IT Talent

Candidates provided by IT Automation are vetted through a comprehensive workflow for screening, assessing, and validating skills, experience and qualifications. We have built a proactive talent pool utilizing a variety of proven recruiting sources, to deliver value to our clients and to the candidates we place. We set a through screening process in the first phase to understand the experience and skill set of each individual before we drive into the actual recruiting process and next steps.

Comprehensive Service Options

We provide a complete capture of contingent, contract and full-time labor services and managed solutions for a broad range of staffing and recruiting requirements. Our solutions are ideal for organizations looking for project or contract support, seeking recruiting expertise for a specialized position, supporting spikes in work volume due to calendar demands, and/or supplementing existing staff with contingent talent.

Reputation For Quality-driven Solutions

At IT Automation, we consult with each client and candidate to understand their unique requirements and provide flexible and scalable service options. Our client-driven methodology emphasizes building long-term partnerships that result in positive business outcomes. As a result, IT Automation has regularly ranked in the top 2% of all staffing companies, as part of Inavero's Best of Staffing™ Client and Talent Lists.

Proven Track Record In Placing Technical Talent

Throughout our history, our niche recruiting staff, have helped many of the market's top employers (including Fortune 500 companies, small businesses, non-profits, associations and government agencies) minimize spend and maximize their operational efficiencies.
